ABOUT CORETECH

- CoreTech Computer Institute provides high quality computer education at a very high standard at a very low cost.
- CoreTech's mission is to create a pool of high quality software professionals who will meet the demanding needs of multinational organizations for tomorrow's challenges.
- Training methods have been maximized with “learning” rather than “teaching” through well equipped lab ONE-TO-ONE ratio (ONE COMPUTER FOR ONE STUDENT).
- With structured combination of theoretical and practical sessions. Our Trainer give teaching in very professional technique and maintain good relation with every students.

INTRODUCTION TO WEB DESIGN

- What is Web Designing?
- What is the difference between Web Design and Development?
- What is domain name and extension?
- Introduction to SDLC.

WHAT IS WEB DESIGN?

- Web design is the process of creating websites. It encompasses several different aspects, including webpage layout, content production, and graphic design. While the terms web design and web development are often used interchangeably, web design is technically a subset of the broader category of web development.

WHAT IS WEB DESIGN?

- Websites are created using a markup language called HTML. Web designers build webpages using HTML tags that define the content and metadata of each page. The layout and appearance of the elements within a webpage are typically defined using CSS, or cascading style sheets. Therefore, most websites include a combination of HTML and CSS that defines how each page will appear in a browser.

KEY POINTS

- Design Plan should include the following:
 - Details about information architecture.
 - Planned structure of site.
 - A site map of pages

WIRE-FRAME

- Wireframe refers to a visual guide to appearance of web pages. It helps to define structure of web site, linking between web pages and layout of visual elements.

WIRE-FRAME - FOLLOWING THINGS ARE INCLUDED IN A WIREFRAME

- Boxes of primary graphical elements
- Placement of headlines and sub headings
- Simple layout structure
- Calls to action
- Text blocks

EDITORS

Codepad	Notepad++
editor PSPad	Stylizer – Real-Time CSS Editing
Xyle scope	Rapid CSS Editor
The Web Editor	EngInSite CSS Editor
Simple CSS — A Free CSS Authoring Tool	

DIFFERENCE BETWEEN WEB DESIGN AND WEB DEVELOPMENT

WEB DESIGNER

VS

WEB DEVELOPER

LOOK AND FEEL

HTML, CSS, JS

COLOR SCHEME

GRAPHIC DESIGN STRUCTURE

FLOW OF INFORMATION

FOCUS ON USER EXPERIENCE

RIGHT BRAINED: CREATIVITY,
IMAGINATION, INNOVATION
AND INTUITION

INTERNAL ARCHITECTURE

JAVA, C++, .NET

FOCUS ON USER INTERFACE

DEVELOPS INTERFACES WITH
CODES OF PROGRAMMING

LEFT BRAINED: TECHNICAL,
LOGICAL AND THINKER

EXPERIENCE OF CODING AND
TECHNICAL KNOWLEDGE IS OF
GREAT IMPORTANCE

WHAT IS DOMAIN NAME AND EXTENSION?

- A domain name is your website name. A domain name is the address where Internet users can access your website. A domain name is used for finding and identifying computers on the Internet. Computers use IP addresses, which are a series of numbers. However, it is difficult for humans to remember strings of numbers. Because of this, domain names were developed and used to identify entities on the Internet rather than using IP addresses.

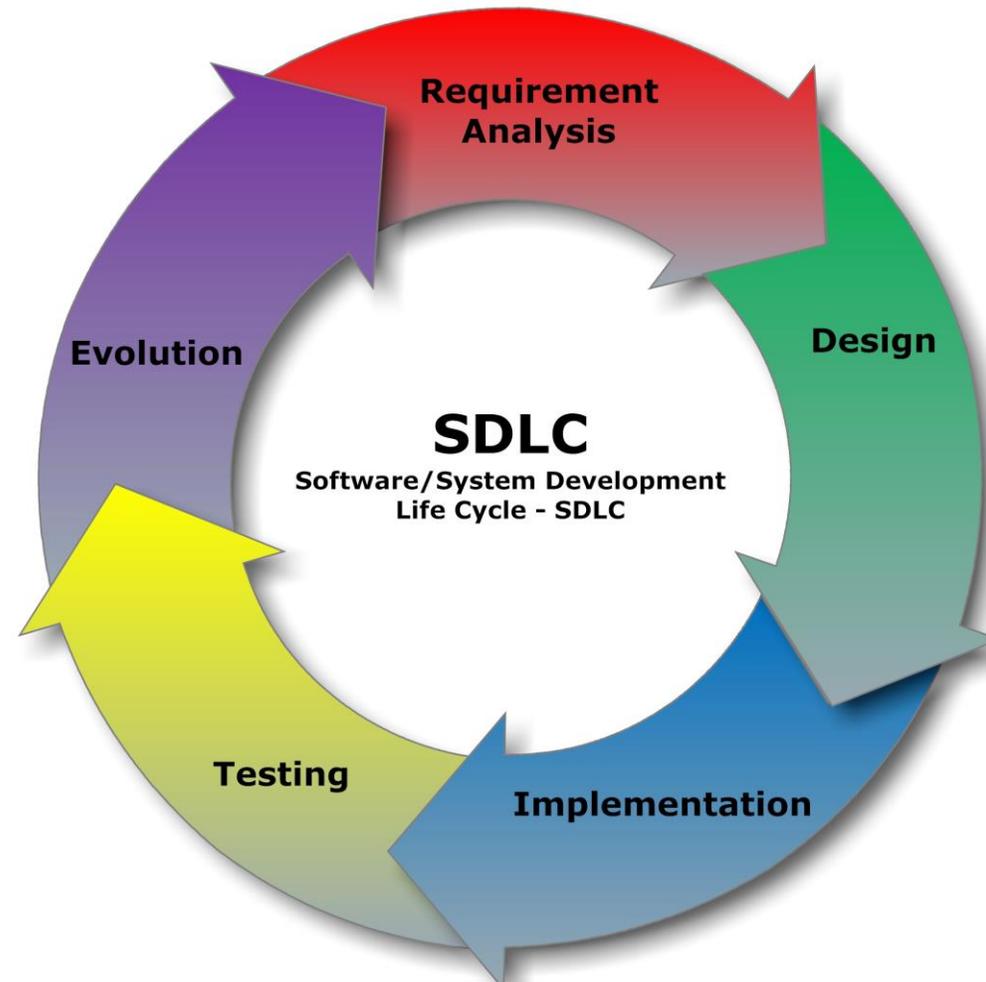

WHAT IS DOMAIN NAME AND EXTENSION?

- A domain name can be any combination of letters and numbers, and it can be used in combination of the various domain name extensions, such as .com, .net and more

WEBSITE CATEGORIES

- Arts and Entertainment
- Business and Consumer Services
- Community and Society
- Computers Electronics and Technology
- E commerce and Shopping
- Finance
